

Test Case id	Test Scenario	Test Description	Pre Conditions	Test Steps	Test Data	Expected Results	Actual Result	Status	Remarks
TC_001	Verify the UI of login page	Verify there are less input field placeholders	User should be on the login page			Login page should only display minimum two input fields: Username and Password with light grey color	Login page displayed minimum two required input fields: Username and Password with light grey color	Pass	
TC_002	Verify the UI of login page	Verify the presence of "Forgot Password" link as recovery option	User should be on the login page			Login page should contain visually prominent forgot password link with green background	Login page doesnot contain visually prominent forgot password link with green background	fail	
TC_003	Verify the UI of login page	Verify the presence of "Password Visibility Toggle" (eye icon)	User should be on the login page			Login page should contain "password visibility" toggle on the password field	Login page doesnot contain "password visibility" toggle on the password field	fail	
TC_004	Verify the UI of login page	Verify the presence of "Remember Me" link for user convinience for frequent users	User should be on the login page			Login page should contain "Remember me" button below the password field	Login page doesnot contain "Remember me" button	fail	
TC_005	Verify the UI of login page	Verify the presence of "Caps Lock Warning"	User should be on the login page	Enter the username with caps lock on.	Username: STANDARD-USER	It should show a validation message mentioning "Caps Lock is on"	Validation message mentioning "Caps Lock is on" did not appear	fail	
TC_006	Verify the UI of login page	Verify the incorporation of Company logo	User should be on the login page			Company logo should be placed on the center	Company logo is placed on the center	Pass	

Test Case id	Test Scenario	Test Description	Pre Conditions	Test Steps	Test Data	Expected Results	Actual Result	Status	Remarks
TC_007	Verify the UI of login page	To verify validation message wraps correctly within the box's width.	User should be on the login page	Enter incorrect password	Password: 1223445	Validation text "Epic sadface: Username and password do not match any user in this service" should be displayed within the validation message box perfectly wrapped	Validation text "Epic sadface: Username and password do not match any user in this service" is displayed but message is not perfectly wrapped	fail	
TC_008	Verify the UI of login page	Verify the Validation message pops up with red background	User should be on the login page	1. Enter Valid Username 2. Enter Invalid password 3. Click on the login button		Validation message should pop up with red background	Validation message pop up appears with red background	Pass	
TC_009	Verify the UI of login page	Verify the login button is visually prominent with bright color (green)	User should be on the login page			Login button must contain a visually prominent (light green) color icon	Login button contains a visually prominent (light green) color icon	Pass	
TC_010	Verify the UI of login page	To verify favicon is visible and visually prominent	User should be on the login page			Correct favicon containing the latest and unstretched logo of sauce labs should be present infront of the page title	Correct favicon containing the latest and unstretched logo of sauce labs was present infront of the page title	Pass	
TC_011	Verify the UI of login page	To verify if placeholder text is hidden while typing	User should be on the login page	Enter username enter password	Username: standard_user Password: Secret_sauce	Placeholder text should disappear while typing the inputs on the placeholder containers	Placeholder text disappears while typing the inputs on the placeholder containers	Pass	

Test Case id	Test Scenario	Test Description	Pre Conditions	Test Steps	Test Data	Expected Results	Actual Result	Status	Remarks
TC_012	Verify the login functionality	Verify "username" field can be filled	User should be on the login page	1. Enter a username	Username: Valid Username	Login page should let the user enter the username	Login page lets the user enter the username	Pass	
TC_013	Verify the login functionality	Verify "password" field can be filled	User should be on the login page	1. Enter the password	Password: Valid password	Login page should let the user enter the password	Login page lets the user enter the password	Pass	
TC_014	Verify the login functionality	Verify "password" field is masked	User should be on the login page	1. Enter the password	Password: Valid password	Password entered by the user should be masked with "*" for each character	Password entered by the user is be masked with "." for each character	fail	
TC_015	Verify the login functionality	Verify "Login" button works	User should be on the login page	1. Enter Valid Username 2. Enter Valid password 3. Click on the login button	Username: Valid username Password: Valid password	It should be redirected to the inventory page	It is redirected to the inventory page	Pass	
TC_016	Verify the login functionality	Verify login is possible with valid username and valid password	User should be on the login page	1. Enter Valid Username 2. Enter Valid password 3. Click on the login button	Username: Valid username Password: Valid password	It should be redirected to the inventory page	It is redirected to the inventory page	Pass	
TC_017	Verify the login functionality	Verify login is not possible with invalid username and invalid password	User should be on the login page	1. Enter Invalid Username 2. Enter Invalid password 3. Click on the login button	Username: 123456 Password: 123456	It should show a validation message mentioning "Epic sadface: Username and password do not match any user in this service"	Validation message mentioning "Epic sadface: Username and password do not match any user in this service" is present	Pass	

Test Case id	Test Scenario	Test Description	Pre Conditions	Test Steps	Test Data	Expected Results	Actual Result	Status	Remarks
TC_018	Verify the login functionality	Verify login is not possible with valid username and invalid password	User should be on the login page	1. Enter Valid Username 2. Enter Invalid password 3. Click on the login button	Username: standard_user Password: 123456	It should show a validation message mentioning "Epic sadface: Username and password do not match any user in this service"	Validation message mentioning "Epic sadface: Username and password do not match any user in this service" is present	Pass	
TC_019	Verify the login functionality	Verify login is not possible with invalid username and valid password	User should be on the login page	1. Enter Invalid Username 2. Enter Valid password 3. Click on the login button	Username: 123456 Password: secret_sauce	It should show a validation message mentioning "Epic sadface: Username and password do not match any user in this service"	Validation message mentioning "Epic sadface: Username and password do not match any user in this service" is present	Pass	
TC_020	Verify the login functionality	Verify login is not possible with Blank username and Blank password	User should be on the login page	1. Leave the username and password empty 2. Click on the login button	Username: Password:	It should show a validation message mentioning "Epic sadface: Username and password is required"	Validation message mentioning "Epic sadface: Username is required" is present	Fail	Validation message should include "Epic sadface: Username and password is required"
TC_021	Verify the login functionality	Verify login is not possible with Blank username and valid password	User should be on the login page	1. Leave Username field empty 2. Enter Valid password 3. Click on the login button	Username: Password: secret_sauce	It should show a validation message mentioning "Epic sadface: Username is required"	Validation message mentioning "Epic sadface: Username is required" is present	Pass	
TC_022	Verify the login functionality	Verify login is not possible with valid username and Blank password	User should be on the login page	1. Enter Valid Username 2. Leave the password field empty 3. Click on the login button	Username: standard_user Password:	It should show a validation message mentioning "Epic sadface: Password is required"	Validation message mentioning "Epic sadface: Password is required" is present	Pass	

Test Case id	Test Scenario	Test Description	Pre Conditions	Test Steps	Test Data	Expected Results	Actual Result	Status	Remarks
TC_023	Verify the login functionality	Verify login is possible with valid username+White Spaces and valid password	User should be on the login page	1. Enter Valid Username with whitespaces 2. Enter Valid password 3. Click on the login button	Username: standard_user Password: secret_sauce	White spaces should automatically be removed and be redirected to the inventory page	Validation message mentioning "Epic sadface: Username is required" is present	fail	Username field should remove whitespaces
TC_024	Verify the login functionality	Verify login is not possible with valid username and valid password+whitespaces	User should be on the login page	1. Enter Valid Username 2. Enter Valid password with whitespaces 3. Click on the login button	Username: standard_user Password: secret_sauce	It should show a validation message mentioning "Epic sadface: Username and password do not match any user in this service"	Validation message mentioning "Epic sadface: Username is required" is present	Pass	
TC_025	Verify the login functionality	Verify the page is responsive on different devices	User should be on the login page	On inspecting page, use the page toggle device toolbar and change the ratios as per the required device		Login page contents should appear correctly on different display resolution ratios	Login page contents appeared correctly on different display resolution ratios	Pass	

Test Case id	Test Scenario	Test Description	Pre Conditions	Test Steps	Test Data	Expected Results	Actual Result	Status	Remarks
TC_001	To Verify the UI for the products page	Verify that the product page loads after login	User should be logged in to the system	Enter the credentials Press login		Page should load successfully, no errors should be displayed	Page loads successfully, no errors displayed	Pass	
TC_002	To Verify the UI for the products page	to Verify the page title displays correctly	User should be logged in to the system			Title should show "Products"	Title shows "Products"	Pass	
TC_003	To Verify the UI for the products page	To verify the Items list container is displayed	User should be logged in to the system			Products list grid should be visible	Products list grid is be visible	Pass	
TC_004	To Verify the UI for the products page	To verify the Favicon is displayed	User should be logged in to the system			Correct favicon should be clealy visible	Favicon was clealy visible	Pass	
TC_005	To Verify the UI for the products page	To verify Product images display	User should be logged in to the system			All product images should be visible	All product images are visible	Pass	
TC_006	To Verify the UI for the products page	To verify all the product names are visible	User should be logged in to the system			Product titles should be displayed correctly	Product titles are displayed correctly	Pass	
TC_007	To Verify the UI for the products page	To verify the product description is visible	User should be logged in to the system			Each product should have a description about the product	Each product have a description about the product	Pass	
TC_008	To Verify the UI for the products page	To verify the product prices are visible	User should be logged in to the system			Prices of each prducts should me mentioned in USD "\$__" format	Prices of each prducts are mentioned in USD "\$__" format	Pass	
TC_009	To Verify the UI for the products page	To verify the "Add to Cart" button is present	User should be logged in to the system			Each item should have a button labeled "Add to cart"	Each item has a button labeled "Add to cart"	Pass	

Test Case id	Test Scenario	Test Description	Pre Conditions	Test Steps	Test Data	Expected Results	Actual Result	Status	Remarks
TC_010	To Verify the UI for the products page	To verify product hover behavior	User should be logged in to the system			On hover, Product name should be highlighted with "Lime green color"	On hover, Product name is highlighted with "Lime green color"	Pass	
TC_011	To Verify the UI for the products page	To verify that the "Add to Cart" button can be clicked	User should be logged in to the system			The Item should be added to cart, button should change to "Remove"	The Item is added to cart, button is changed to "Remove"	Pass	
TC_012	To Verify the UI for the products page	To verify that the Remove from Cart functions	User should be logged in to the system			Item should be removed, button should change back to "Add to cart"	Item is removed, button is changed back to "Add to cart"	Pass	
TC_013	To Verify the UI for the products page	To verify the Cart badge counter updates	User should be logged in to the system	Add items to Cart		Cart counter should increase after adding item	Cart counter is increased after adding item	Pass	
TC_014	To Verify the UI for the products page	To verify Multiple items cart count	User should be logged in to the system	Add all items to cart		Badge should show total count when multiple added	Badge shows total count when multiple items are added	Pass	
TC_015	To Verify the UI for the products page	To verify Filter dropdown load	User should be logged in to the system			Dropdown should load with filter options "Name A to Z", "Name Z to A", "Price high to low", "Price low to high"	Dropdown loads with filter options	Pass	
TC_016	To Verify the UI for the products page	To verify the filter "Filter: Price: Low to High" functions	User should be logged in to the system	click on filter dropdown Select "price: low to high"		Items should reorder correctly by increasing price	Items is reordered correctly by increasing price	Pass	
TC_017	To Verify the UI for the products page	To verify "Filter: Price: High to Low" functions	User should be logged in to the system	click on filter dropdown Select "price: high to low"		Items should reorder correctly by decreasing price	Items is reordered correctly by decreasing price	Pass	

Test Case id	Test Scenario	Test Description	Pre Conditions	Test Steps	Test Data	Expected Results	Actual Result	Status	Remarks
TC_018	To Verify the UI for the products page	To verify the filter "Filter: A to Z" functions	User should be logged in to the system	click on filter dropdown Select "Name: A to Z"		Items should reorder alphabetically A to Z	Items is reordered alphabetically A to Z	Pass	
TC_019	To Verify the UI for the products page	To verify the function "Filter: Z to A" functions	User should be logged in to the system	click on filter dropdown Select "Name: Z to A"		Items should reorder alphabetically Z to A	Items is reordered alphabetically Z to A	Pass	
TC_020	To verify session expiration on browser back button click after logout.	To verify the user is not redirected to the product page after logging out by pressing browser back button	User should be logged out from the system	Click the logout button Click on back button after being redirected to the log in page		Browser back should take user to login and should display validation message "Epic sadface: You can only access '/inventory.html' when you are logged in."	Browser back takes user to login and display validation message "Epic sadface: You can only access '/inventory.html' when you are logged in."	Pass	
TC_021	To verify session behaviour of the products page	To verify Access inventory without login is possible	User should be logged in to the system	Insert the URL of inventory		Should redirect to login page with validation message "Epic sadface: You can only access '/inventory-item.html' when you are logged in."		Pass	
TC_022	To verify session behaviour of the products page	To verify "Session timeout"	User should be logged in to the system			Session expires after timeout and user is redirected to login with validation message "Session timed out"	Session expires after timeout and user is redirected to login. validation message "Session expired" not present	Fail	

Test Case id	Test Scenario	Test Description	Pre Conditions	Test Steps	Test Data	Expected Results	Actual Result	Status	Remarks
TC_023	To verify Responsiveness of the page	To verify the product page is responsive on and Iphone 14 pro	User should be logged in to the system		Page Dimensions: 430*932	Layout should adjust and remain user-friendly	Layout adjusts and remains user-friendly	Pass	
TC_024		To verify the product page is responsive on and Ipad pro	User should be logged in to the system		Page Dimensions: 1024*1366	Layout should adjust and remain user-friendly	Layout adjusts and remains user-friendly	Pass	
TC_025		To verify the product page is responsive on Samsung Galaxy s20 ultra	User should be logged in to the system		Page Dimensions: 412*915	Layout should adjust and remain user-friendly	Layout adjusts and remains user-friendly	Pass	
TC_026		To verify the page can be navigated using the keyboard	User should be logged in to the system			All interactive elements should be reachable		Fail	

Test Case id	Test Scenario	Test Description	Pre Conditions	Test Steps	Test Data	Expected Results	Actual Result	Status	Remarks
TC_H_001	To Verify the UI and functionality of Header	To verify header banner is present	User should be logged in to the system	N/A	N/A	Header should be visible	Header is visible	Pass	
TC_H_002	To Verify the UI and functionality of Header	To verify the visibility of the logo	User should be logged in to the system	N/A	N/A	Sauce Labs logo should visible and correctly center aligned	Sauce Labs logo is visible and correctly center aligned	Pass	
TC_H_003	To Verify the UI and functionality of Header	To verify hamburger icon is present at the left side of the header	User should be logged in to the system	N/A	N/A	Hamburger icon should be present on the left side of the header.	Hamburger icon is present on the left side of the header	Pass	
TC_H_004	To Verify the UI and functionality of Header	To verify Cart icon is placed on the right side of the header	User should be logged in to the system	N/A	N/A	Cart icon should be present on the right side of the header	Cart icon is present on the right side of the header	Pass	
TC_H_005	To Verify the UI and functionality of Header	To verify that the hamburger icon functions	User should be logged in to the system	Press on the hamburger icon	N/A	Side bar should open	Side bar opened	Pass	
TC_H_006	To Verify the UI and functionality of Header	To verify the contents of the side bar	User should be logged in to the system	Press on the hamburger icon	N/A	Side bar should contain close button, All Items, About, Logout, Reset App State links	Side bar should contain close button, All Items, About, Logout, Reset App State links	Pass	
TC_H_007	To Verify the UI and functionality of Header	To verify the sidebar close button functions	User should be logged in to the system	Press the hamburger icon Press the close button	N/A	Close button "X" symbol should be present on the top right side of the side bar and should close the side bar when pressed	Close button "X" symbol is present on the top right side of the side bar and the side bar is closed when pressed	Pass	
TC_H_008	To Verify the UI and functionality of Header	To verify the user is directed to inventory when "All items" link is clicked on the side bar	User should be logged in to the system	Press the hamburger icon Press the "All items" link	N/A	The user should be redirected to the "inventory.html" products page	The user is redirected to the "inventory.html" products page	Pass	

Test Case id	Test Scenario	Test Description	Pre Conditions	Test Steps	Test Data	Expected Results	Actual Result	Status	Remarks
TC_H_009	To Verify the UI and functionality of Header	To verify the user is directed to the official saucedemo.com page when "About" link is clicked on the side bar	User should be logged in to the system	Press the hamburger icon Press the "About" link	N/A	The user should be redirected to the official website " https://saucedemo.com/ "	The user is redirected to the official website " https://saucedemo.com/ "	Pass	
TC_H_010	To Verify the UI and functionality of Header	To verify Logout link functionality	User should be logged in to the system	Press the Hamburger Icon Press the logout button	N/A	Log out button when pressed should redirect the user to login page	Log out button when pressed redirects the user to login page	Pass	
TC_H_011	To Verify the UI and functionality of Header	To verify the functionality of "Reset App State" link on the side menu	User should be logged in to the system	Add all items to the cart which increases the counter Press the hamburger icon Press on "Reset App State"	Add all items to the Cart	The cart counter should set to empty, all the buttons should revert to "Add to cart" and the filter used must return to initial phase	The cart counter is set to empty, all the buttons but the page had to refreshed to revert to "Add to cart" and the filter used returned to initial phase	Fail
